

technisch onderzoek BLOG

input overview

The topic/phenomenon/skill you will be researching, including the artifact you will produce at the end.

A MoSCoW analysis of it.

Show your activities in the blog that you are using or at least you show how you set it up.

Show research on the topic that you might have done (link to similar project(s), paper, blog)

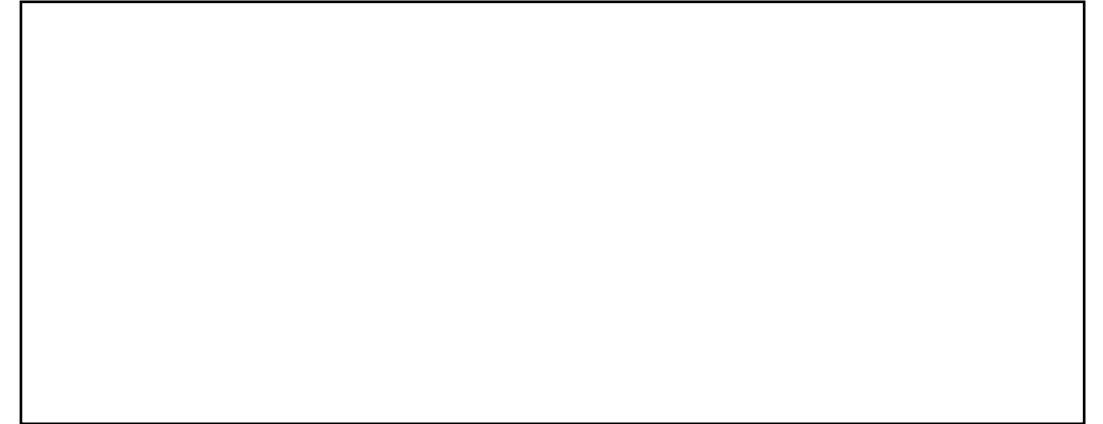

MoSCoW

experiments in brass mute

- M - Must have, tonal relevance to degree of executed research
- S - Should have, tonal adjustment possibility, biodegradable
- C - Could have, ability of producing multiple with it still being biodegradable
- W - Won't have. plastics, unsustainable design choices

What bothers the most in research things to research.

- Impedance in acoustic domain
- Impedance simplified in terms of material and shape choice.
- Prototype after first understandings of impedance as material for sound
- Silence? or Louder?
